Alexandria, VA 22313-1450

APPLICANT'S SUMMARY OF INTERVIEW

Applicant, though the undersigned attorney, expresses appreciation for Examiner Joo's courtesy of granting a personal interview on June 22, 2005 for discussing patentability of the pending claims. Applicant concurs with the Examiner Interview Summary dated June 22, 2005 as prepared by Examiner Joo, and adds the following comments.

The undersigned, Applicant, Examiner Woo and Supervisory Examiner Larry Donahue discussed the patentability of Claim 1 as presented in the Supplemental Amendment dated May 31, 2005. Applicant pointed out such matters as that the user of the presently claimed system does not need to manually enter a postal address into a computer, as required in the Sutcliffe reference. This is because geographic information of location of a user is determined automatically "from a geographic location information system," as recited in Claim 1.

Agreement was reached that Claim 1 and its dependent claims patentably distinguished over the prior art.

I certify that the foregoing document and any document(s) referenced below are being mailed by first-class mail, postage-prepaid, to the address stated above on the date stated below.

Dated: June 28, 2005

Respectfully submitted,

Charles E. Bruzga
